MISSION

Attend the most diverse projects by ensuring practicality and speed, with maximum reliability.

VISION

Be a reference in the execution of works, transmitting confidence and contributing to the success of our customers.

VALUES

Be transparent and ethical, respecting the market, employees and partners, as essential agents for our development.

ENGINEERING & CONSTRUCTION

ZACI's range of services covers the entire project lifecycle. From engineering services, advice, execution, monitoring and support to its customers throughout the entire value chain, based on vast experience and focus on service quality.

Construction

ZACI provides a complete turnkey solution for its clients, and guarantees a large-scale project implementation. Focus on construction projects (commercial, residential and industrial) and is driven to deliver highly complex projects. Attends and exceeds industry standards with an emphasis on safety, quality and on-time delivery.

Construction of Electric Networks

ZACI provider of high voltage transmission and power electric lines, substation and distribution construction and maintenance services within the grid (on-grid), inspection and assembly of smart meters, energy storage (ESS) and off-grid systems.
