MISSION

Attend the most diverse projects by ensuring practicality and speed, with maximum reliability.

VISION

Be a reference in the execution of works, transmitting confidence and contributing to the success of our customers.

VALUES

Be transparent and ethical, respecting the market, employees and partners, as essential agents for our development.

MAINTENANCE

ZACI Maintenance Service are about preventive maintenance that entails pre-planned routine inspection, repairing and testing of civil engineering structures to ensure safe and efficient operation of infrastructures, in order, to extend the property livelihood. This service keeps the client assets in proper condition, care or upkeep including: taking steps to avoid the property from breaking down (preventative maintenance) and bringing something back to working order (corrective maintenance).

Electric

ZACI performs electrical maintenance in order to prevent damage and correct various technical problems based on good practices to avoid accidents that can compromise safety, work and/or production.

Hydraulic

ZACI detects defects early and minimizes the occurrence of failures and damage to hydraulic equipment and infrastructure. It operates in industrial, commercial and domestic environments by planning and executing preventive and periodic maintenance, in order to maintain high quality performance.

HVAC

ZACI designs solutions to reduce operating costs, maintaining a comfortable and safe working environment in the facilities. These services include operational assessments, planned maintenance and corrective. It monitors the customer from the initial assessment to ongoing periodic maintenance programs.

Construction

ZACI conducts civil construction maintenance on client's premises who intend to improve the structural part of its premises. The focus is on providing the best possible and cost-effective solution.

⋮ Landscape Architecture

⋮ ZACI provides design, planning, assembly, maintenance and decoration services by highlighting sublime results according to aesthetic and sustainable standards, integrating Man with Nature.

⋮ Swimming Pool

⋮ ZACI maintains swimming pools in order to ensure clean and safe water for users, following the steps below: removal of leaves and debris, brushing of sediment from the walls and floor and pool vacuuming, as well as maintenance of the infrastructure itself.
